

# Yassin Eldeeb

## Senior Software Engineer

 Egypt    [yassineldeeb94@gmail.com](mailto:yassineldeeb94@gmail.com)    <https://twitter.com/YassinEldeeb7>

## About Me

I improve developers' experiences with clever software.

## Open Source Projects

### Create Prisma Generator

 <https://github.com/YassinEldeeb/create-prisma-generator>

A CLI for getting started developing your own Prisma generator by running a single command.

### Memos

 <https://github.com/YassinEldeeb/memos-app>

Free with no Ads cloud storage for your best moments.

### Prisma TypeGraphQL Types Gen

 <https://github.com/YassinEldeeb/prisma-tgql-types-gen>

Prisma generator for generating TypeGraphQL class types and enums and by introspecting the generated files, It can detect the changes you’ve made to sustain them in the next gen while correcting you if you mess up the types.

### Sick Market

 <https://github.com/YassinEldeeb/Sick-market>

An Ecommerce that has a very unique dashboard for admins and lots of cool features for users.

### TS Env Typings

 <https://github.com/YassinEldeeb/Env-Typings-VSC>

A VS Code extension that auto generates typings for process.env from your .env variables as you’re developing.

### Shot

 <https://github.com/YassinEldeeb/Shot>

A super fancy Awwwards type website, showcasing a professional photographer’s work.

### Estimation Bot

 <https://github.com/YassinEldeeb/estimation-bot>

A bot for competing with estimation cards game pro players and actually beat them. (Unfinished Project due to the impossibility of predicting using just math formulas)

### Ignite

 <https://github.com/YassinEldeeb/ignite-react>

A platform for discovering new and popular games, It has a huge games collection that you can search and learn everything about each game.
